

SHOP BY BRAND FOR MAGENTO 2

ICT

SHOP BY BRAND : INSTALLATION GUIDE

1. Login into the backend, go to System — Cache Management and enable all types of cache.

2. Connect to your website source folder with FTP/SFTP/SSH and upload all the extension files and folders to the root folder of your Magento installation:

Please use the “Merge” upload mode. Do not replace the whole folders, but merge them. This way your FTP/SFTP client will only add new files. This mode is used by default by most of FTP/SFTP client’s software. For MacOS it’s recommended to use Transmit. If you install several extensions from ICT, they will contain same files from the Base package — feel free to overwrite them, these are system files used by all our extensions.

3. Run following command:

```
php bin/magento setup:upgrade
```

4. Go to System — Cache Management page under Magento backend and click “Flush Cache Storage” button. After this action, the extension is installed.

What is Lorem Ipsum?

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem Ipsum.
